Trading fees

Kalshi charges a percentage fee on the expected earnings on an individual contract. Expected earnings are calculated by multiplying the implied probability of a contract paying out by maximum potential earnings from the contract - or \$1 minus the price of the contract. The current fee charged for a trade in dollars is given by the following formula.

$$\text{fees} = \text{round up } (0.07 \times c \times p \times (1-p))$$

p = the price of a contract in dollars (50 cents is 0.5)

c = the number of contracts being traded

round up rounds to the next cent

We charge this fee only to “liquidity takers,” who place orders that match orders sitting on the orderbook to complete a trade. We do not charge a fee to “liquidity makers” who place an order that rests on the orderbook waiting to be matched. Please see the fee table on the next page for examples.

ACH Fees

There is no fee associated with ACH deposits from your bank account to your Kalshi account and a \$2 fee for all withdrawals from your Kalshi account to your linked bank account.

Wire Fees

Fees for wire transfers vary from bank to bank. Kalshi does not charge any additional fees for wire transfers. Currently, only wire deposits are supported.
