Specific Trading Fees for Election Markets.

There are no trading fees on Kalshi markets on the outcome of the 2024 US election, or related to the outcome of the 2024 US election. This includes, but is not limited to, the Rulebook tickers beginning with PRES-2024.

Trading Fees

The following terms apply to all markets on the exchange apart from Election Markets, and apart from specific products listed below which have their own fee schedule.

Trading fees are only charged for orders that are immediately matched with orders sitting on the orderbook. Trading fees are not charged for orders placed that are not immediately matched and are instead left as resting orders on the orderbook.

Trading fees are charged as a variable percentage fee of the expected earnings on an individual contract which is calculated by multiplying the maximum potential earnings from the contract by the implied probability of making those earnings - or the price of the contract divided by \$1. The current general fee charged for a trade in dollars is given by the following formula:

$$\text{fees} = \text{round up}(0.07 \times C \times P \times (1-P))$$

P = the price of a contract in dollars (50 cents is 0.5)

C = the number of contracts being traded

round up = rounds to the next cent

Settlement Fees

There is no settlement fee.

Processing Fees

There is no processing fee.

Membership Fees

There is no membership fee.

ACH Deposit Fees

There is no fee associated with ACH deposits from your bank account to your Kalshi account.
